BPE2

[Product Code:] BPE2

[Product Name:] 4,4'-ISOPROPYLIDENEBIS(2-PHENOXYETHANOL)

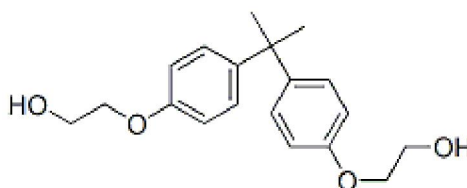

[Synonyms:]

2,2'-[(1-methylethylidene)bis(4,1-phenyleneoxy)]bis-ethano; 2,2'-[(1-methylethylidene)bis(4,1-phenyleneoxy)]bis-Ethanol; 2,2'-[Isopropylidenebis(p-phenyleneoxy)]diethanol;

Molecular Formula: $C_{19}H_{24}O_4$

Molecular Weight: 316.39

Structural Formula:

Application: Monomer used in copolymerization of various resins, mainly used for coating, electrophoretic paint, radiation cured; and adhesives. It can improve the anti-crossive, hardness and other performance of the system.

Specification:

ITEM	SPECIFICATION
Appearance	Colorless to yellowish solid
Colorness (APAH, Pt-Co)	<100
Hydroxyl Value (mgKOH/g)	330-350
pH	5.0~7.0
Moisture Content	<0.1%

[Package:] 25 kg in plastic drums or 220kg in iron drums.

Storage: Store in cool, dry places and keep sealed before use.
